become a self-employee, control your work relationship, and control workload. In addition to gain more and more money.

All of what you should do is to register to our website.

Feel free to do so.

Introduction

Freelancing is a contract-based profession where you use your skills, education, and experience to work with many clients and take on different tasks. Freelancing usually includes jobs that allow you to work from home. It is just that many of the jobs performed by freelancers can be delivered online without being in the company's or client's place to increase income and avoid any disasters in the world such as the coronavirus that turned the world upside down.

Winton website acts as a link between the freelancer and the client and facilitates communication between them, and it is easy to use and helps the client to follow up on the previous work of the freelancer, and if he sees that he meets his needs, he begins to communicate with him, or the client writes a publication with all his needs and determines the time and the required price, and the freelancers begin to communicate with him.

One of the most important advantages of Winton instead of working for one full-time employer and getting a fixed salary in return, he has many clients according to his terms and price, because he believes that his work is worthy.

Once the freelancer has determined the services they will provide, Winton allows them to share a collection of previous works, depending on their own skill, so that customers begin to communicate with him to implement their need and as the beauty of his work increases, more projects will come to him, for example, in terms of designing independent drawings, this may come in the form of images you have developed, and perhaps some pieces of art, as well as samples of previous works.

Description

This site is a marketplace there exist a three type of person, person need a service and person who do this service and admin to monitor and administrate this website ,add person to this website. any person can find services in different prices. This site provide a convenient way for freelancers to find work and for employers to find qualified professionals to complete their projects ,all member in this site can post works and jobs to be shown on the site according to the member field .then they can see all requests on their posts, person has a features to delete reply or posts of him and posts of person exist on personal page according to latest posts ,any person can see posts at the same field and can go to personal page of this person and see old posts

this website has Many advantages such as:

- This website is a free to login and make account in it.
- Employers can find services easily with different prices .
- If employers find their service can contact with person that do this service easily .
- Save time that you search to find service.

There exist many pages or frames in this site

- Index Page
- Register page
- Sign in page
- Main page
- Personal portfolio
- Portfolio view

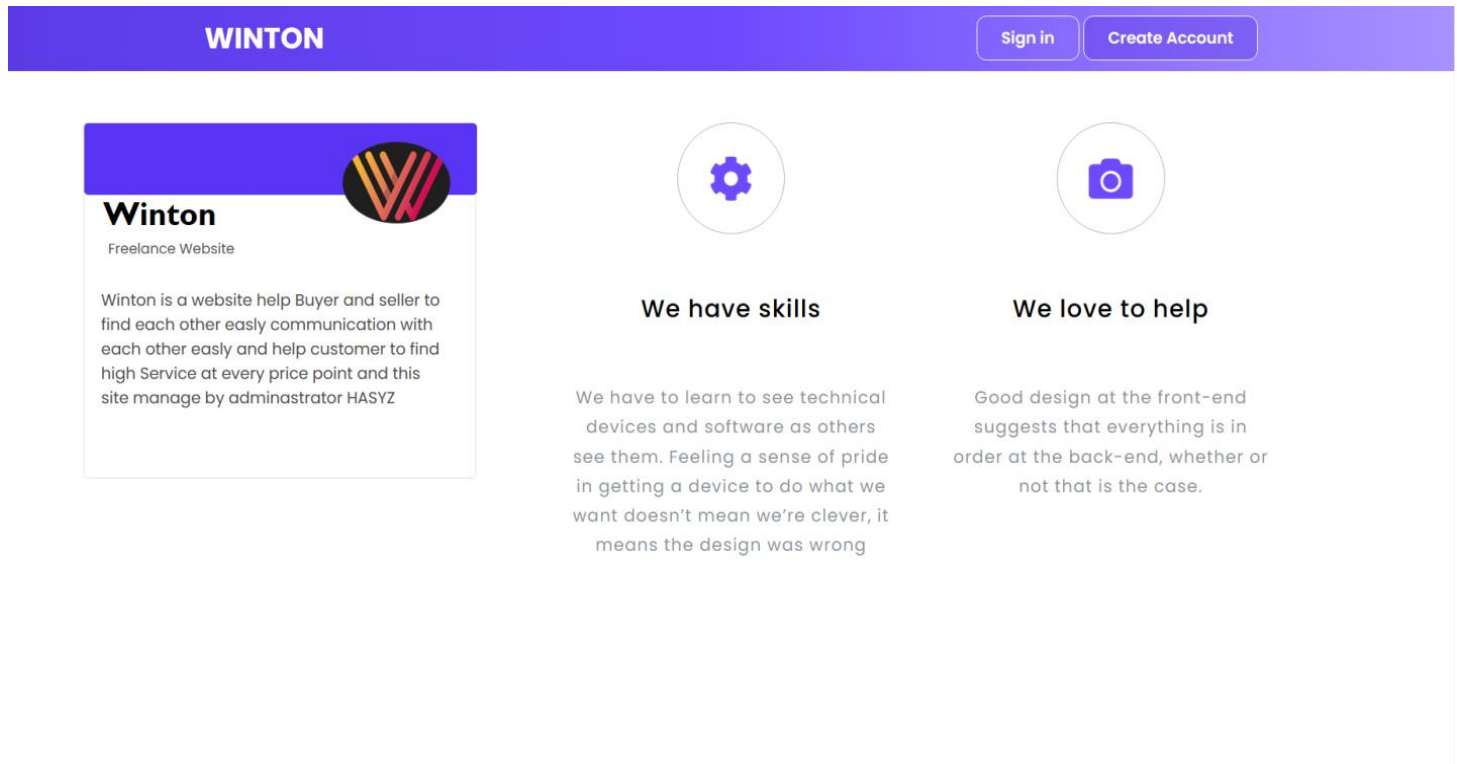

Services

- Presenting the user's file (his posts, method of dealing, and previous work) to customers to facilitate communication between the worker and the customer.
- Facilitates the interaction between the worker and the customer (transferring information about the required project, receiving payment after receiving the project, receiving the customer's evaluation after receiving it)
- Helps the client to know the employee by presenting his previous work and evaluating it from his previous clients and his way of dealing.
- It helps its users to receive work from home, working from home is more comfortable for many people. Employees can save a great deal of time and money because they do not have to travel as much, which means that people will have more time for work and for themselves as well. People can choose to work in their garden or backyard, anywhere that makes them comfortable to work. Moreover, employees are under less stress because they decide when to work and when to take a break. These things will help in giving better performance of the tasks.
